FEATURES

- Kit includes all the parts required to complete an installation of an aftermarket headunit conveniently in one box
- Suitable for double din aftermarket AV headunit installation
- Mechless shallow mount headunits recommended for easier installation due to their mounting depth
- High quality satin or piano black finish
- Retains steering wheel control functionality, including phone button
- Includes integrated buttons for adjusting climate control and various vehicle settings
- Climate Control and Vehicle Information display on aftermarket AV headunit
- MagMate magnetic phone holder built into facia kit for convenient phone mounting, metal phone plate included
- Provides output feeds for reverse trigger, park brake and speed pulse
- Suitable for vehicles with single or dual zone climate control
- To simplify installation, this kit is compatible with Aerpro APP8 and APP9 aftermarket headunit harness adapters

Please Note:

- 1) Not compatible with FGX Models.
- 2) Mechless shallow mount headunits recommended for easier installation due to their mounting depth.
- 3) Aftermarket headunit must be SWC compatible and Steering Wheel Control Functions may vary from the OEM Functions.
- 4) This kit is designed for aftermarket AV double din headunits with an RCA camera input.
- 5) Vehicles with OEM reverse sensors or camera will require additional parts to retain reversing tone and reverse image, CHF01B reverse chimes box and APVFD02 retention harness, these parts are sold separately.
- 6) Headunit ISO harness not included in the kit. Recommended to be installed with an Aerpro APP9 Headunit Secondary ISO Harness & SWC Patch Lead (sold separately).
