GEN III LED High Beam Performance Globes

Performance Characteristics

- Upgrades the vehicle's high beam performance to be similar to a 14" 5 Watt L.E.D light bar (tested against Narva LED Light Bar P/No. 72273*) with a simple globe change.
- Up to 25x more life than a standard globe makes these globes a 'fit and forget' option for any suitable vehicle.
- No filament or moving parts make these globes ideal for rough terrain. Shock and vibration resistant to international standards (IEC 60068-2-64).

* Results vary with vehicle headlamp type

Shock & vibration resistant

These High Beam Performance Globes are engineered for high beam applications only and **will not be covered by warranty if installed in a low beam application**
