# GEN III LED Performance Globes

## Performance Characteristics

- 300% more light on the road with a 60 metre longer beam when compared to a standard halogen globe.
- Up to 30x more life than a standard halogen globe making L.E.D a 'fit and forget' option for any suitable vehicle.
- No filament or moving parts make these globes ideal for rough terrain. Shock and vibration resistant to international standards (IEC 60068-2-64).

Shock & vibration resistant
