

NEW PRODUCT RELEASE

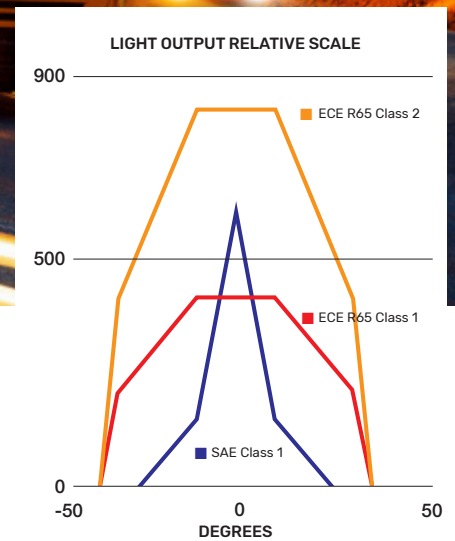

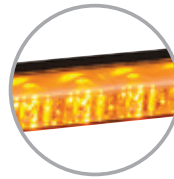

12/24 Volt Slimline L.E.D Warning Light

P/No. 85211A-R65
Amber shown not lit

85211A-R65
Lamps shown as lit

FEATURES

- 13mm Narrow profile, solid aluminium housing
- ECE R10 EMC compliant
- Maximum visibility, up to 6 times brighter than SAE
- Meets both ECE R65 Class 1 & 2 Standards
- Versatile mounting with multi-angle bracket included
- 18 Selectable flash patterns
- Dim function for night use

With a super narrow height profile of just 13mm and a universal multiangle bracket included, Narva's slimline LED Warning Lights are ideal for tight spots like front grill

applications and have a unique optic design that allows for efficient and powerful SAE Class light output from multiple directions.

Powered by 6 x high-powered 1 watt L.E.Ds, up to 18 different flash patterns can be chosen from, with the ability to synchronise multiple units for simultaneous or alternating flash – the last pattern being stored in memory for next power up.

A solid aluminium housing makes for efficient heat dissipation and maximum durability, whilst a weatherproof and vibration resistant design make it ideal for both internal and external use. Reverse polarity protection, compliance with ECE R10 EMC and Narva's 5 year L.E.D warranty ensure peace of mind.

NEW PRODUCT RELEASE

12/24 Volt Super Low-Profile L.E.D Warning Light

P/No. 85215A-R65
Amber shown not lit

85215A-R65
Lamp shown as lit

FEATURES

- 6 x 1W L.E.Ds with 23 flash patterns
- Maximum visibility, up to 6 times brighter than SAE
- Meets both ECE R65 Class 1 and Class 2 and is ECE R10 compliant
- Low profile surface mount at only 9mm high
- Heavy duty aluminium housing
- Weatherproof (IP67) and vibration resistant
- Dim function for night use

With a super low profile of just 9mm Narva's low profile L.E.D Warning Light has been designed to be mounted horizontally or vertically depending on

application and has a unique optics design that allows for efficient and powerful ECE R65 Class 2 light output from multiple directions.

Powered by 6 x high-powered 1 watt L.E.Ds, up to 23 different flash patterns can be chosen from, with the ability to synchronise multiple units for simultaneous or alternating flash – the last pattern being stored in memory for next power up.

A solid aluminium housing makes for efficient heat dissipation and maximum durability, whilst a weatherproof and vibration resistant design make it ideal for both internal and external use. Reverse polarity protection, compliance with ECE R10 EMC and Narva's 5 year L.E.D warranty ensure peace of mind.
