SUREFIT GEN II

Narva's Surefit L.E.D Globes Gen II

Narva's new Surefit L.E.D Globes GEN II boasts a more compact design than its predecessor, allowing for a better fit in a wider range of vehicles.

Sold in pairs, the Surefit GEN II offers a precise 5700°K crisp white light output at 5,000 Lumens* and with a superior range and colour to any standard halogen globe. Equipped with an IP65 rated fan that provides cooling and due to the low current draw premium L.E.Ds the Surefit GEN II globes lasts up to 25 times longer than its halogen counterparts.

To date most retrofit L.E.D globes have produced a poor beam pattern with lots of stray wasted light when used in projector style headlamps. The SUREFIT H7 'Projector' L.E.D Globe has been manufactured with precision engineering however, giving a maximum output with minimal waste.

*Except 18437P - 4000 Lumens per pair

The Narva SUREFIT Globes come in a range of globe fitments – H4, H7, H8/9/11 and HB3 for standard headlights and H7 for projector headlights. Unsure what type of headlight your vehicle has?

Here's a simple ID check:

P/Nos. 18434, 18435, 18437 & 18438
Suits Standard Headlights

P/No. 18437P
Suits Projector Headlights

Powerful crisp white light output

Precise beam cut off

In-built IP65 rated fan for optimised cooling

Reinforced housing with no filament

Super quiet operation with EMC protection

Same size as halogen – fits any vehicle
